Where are they now?

TMSCA catches up with former UIL math, science competitors

TMSCA has decided to feature some former students whose careers have been tremendously influenced by their TMSCA experience. If you would like to share the story of a former student and how his/her college/future career were influenced by their dedicated TMSCA/UIL coaches and participation in TMSCA/UIL competitions, please send this information and/or picture to carolekellamstringfellow@gmail.com.

David Stevens graduated from Rotan High School in 1986. He was a TMSCA State qualifier in Calculator and Science and a two-time regional qualifier in UIL Calculator Applications. He competed in a number of other UIL academic activities including journalism, speech and theatre. He participated in the UIL State Meet in CX Debate in 1985 and One-Act Play in 1986.

David's 19-year tenure in Texas public schools as a teacher and administrator includes considerable experience with UIL activities built upon his participation from his early years. He served as state one-act play adjudicator and contest manager, district spring meet chair, campus academic coordinator and one-act play director. His UIL teams earned two state academic sweepstakes championships and he directed five one-act play productions that advanced to the UIL State Meet,

winning the state championship twice and first-runner up twice.

David graduated from the University of Texas at San Antonio.

sity of Texas at Austin with a Bachelor of Fine Arts in Theatre Education and a minor in Mathematics, the University of Oklahoma with a Master of Fine Arts in Drama and from the University of North Texas with a Doctorate in Educational Administration.

David joined the UIL state office in March 2012 as the Director of Academic Activities. He said he recognizes that the trajectory of his life was determined by dedicated teachers from his tiny rural west Texas town that were willing to travel many weekends to practice meets and tournaments. He said he greatly admires the teachers he has the honor of working with from across the state who are willing to provide these same opportunities to their students today.

A synopsis of TMSCA's 4 contests

Number Sense

Number Sense involves a 10-minute, 80-question mental math test covering all high school mathematics courses. Shortcuts need to be developed and practiced in order to compete and finish the test.

Science

This contest challenges students to do a wide range of reading in biology, chemistry and physics, to gain an understanding of the significance of experiments rather than to recall details, to be alert to new discoveries and information in the areas of science, to gain an understanding of the basic principles as well as knowledge of the history and philosophy of science, and to foster a sense of enthusiasm about how science affects our lives.

Calculator Applications

This contest includes calculations involving addition, subtraction, multiplication, division, roots, powers, exponential, logarithms, trigonometric functions and inverse trigonometric functions. In addition to straightforward calculation problems, the contest includes geometric and stated problems similar to those found in algebra, geometry and trigonometry textbooks, previous contests and League materials related to the contest.

Mathematics

This contest is designed to test knowledge and understanding in the areas of algebra I and algebra II, geometry, trigonometry, math analysis, analytic geometry, pre-calculus and elementary calculus.
